SUMMARY

Senior Full Stack Engineer Lead with a decade of extensive experience in software engineering, database development, and DevOps. Proven experience in designing and building secure, stable, and scalable web applications and services. Seeking a position that will leverage the latest technologies to develop innovative solutions.

EXPERIENCE

Senior Full Stack Engineer Lead

CargoSprout

November 2022 - October 2023, Vancouver, British Columbia

- Developed an AI automation pipeline platform backed by a Postgres database and GPT-4 API to allow 3PLs and Freight Forwarding companies to streamline their outreach, booking and cost management in securing transportation for imports/exports of goods from the terminal to the consignee.
- Also developed a platform in which real-time alerts and suggestions would be made to platform users with real-time data being streamed in from a 3rd party provider and GPT-4 API.
- Led the hiring and training of junior developers.
- Reduced team costs by leveraging 3rd party services and/or building internal services.

Full Stack Developer / Consultant

Self-employed

March 2021 - November 2022, Vancouver, British Columbia

- Developed deliverables pipeline for clients that seek to streamline their development processes and increase their productivity and accountability
- Managed and trained clients in scoping workflows and feature sets to optimize development output
- Provided 1-on-1 coaching and training sessions to junior and intermediate engineers
- Developed and implemented automated build pipelines
- Integrated popular analytical libraries into existing platforms
- Provided clients with estimated costs, pros and cons, and development estimates for their proposed projects

Technical Lead

Wildbunch Software

April 2019 - March 2021, Vancouver, British Columbia

- Acquisition and management of development talent for the company
 - Provided quotes on cost and time for development tasks and contracts accepted by Wildbunch Software
 - Trained junior and intermediate developers with 1-on-1 coaching
 - Managed relationships with customers, vendors and other clients to increase favorability and grow the business
 - Scoped the projects and created milestones for each one to ensure every project did not go off track
 - Orchestrated exit and pivot strategies when scheduled work or internal tasks had to be changed or stopped
 - Built, developed and maintained small to large-scale applications on the cloud
 - Researching new or better technologies that could either integrate or place pre-existing systems to propel the software to new heights
-
